

# Green PC World Private Limited

## Corporate Compliance & Sustainability Guidelines

### COMMITMENT TO SUSTAINABILITY

At **Green PC World Private Limited**, environmental sustainability is at the core of our operations. As a leading provider of refurbished laptops and computing solutions, we are dedicated to the responsible management of electronic products at the end of their lifecycle. We strictly adhere to national and international frameworks for electronic waste (E-Waste), battery disposal, and environmental protection to ensure a circular electronics future.

## E-Waste Management & Recycling Framework

Proper handling of electronic waste is critical to minimizing environmental impact. We comply with all updated government mandates regarding the collection, dismantling, refurbishing, and recycling of IT equipment.

### **E-Waste (Management) Rules, 2022 (Latest Amendments)**

Governs the comprehensive lifecycle management of electronic goods, enforcing strict recycling targets and mandatory environmentally sound management practices for IT equipment.

### **E-Waste (Management) Rules, 2016 & 2011**

Foundational frameworks establishing the responsibilities of producers, dismantlers, and recyclers to prevent hazardous e-waste from entering landfills.

## Extended Producer Responsibility (EPR)

---

As a responsible entity in the technology sector, we actively participate in the EPR framework, ensuring that the lifecycle of every computing device we handle is tracked from procurement to responsible disposal.

- **Final Uniform Framework on EPR:** Ensures centralized accountability for the collection and recycling of end-of-life electronics.
- **EPR Authorization Guidelines:** Strict adherence to IT & Telecommunication equipment quotas and reporting standards.

## Battery Waste Management

---

Laptops and computing devices rely on lithium-ion and other advanced battery types that require specialized, safe handling to prevent toxic leakage and fire hazards.

### **Battery Waste Management Rules, 2022**

Mandates the safe collection, secure transportation, and certified recycling of all waste batteries, promoting the recovery of precious metals and preventing soil contamination.

## Plastic & Packaging Waste Management

---

We are committed to reducing our footprint by adhering to strict plastic handling and sustainable packaging policies during the shipping and processing of our refurbished systems.

- **Plastic Waste Management Rules, 2016 (Amended):** Enforces the phase-out of single-use plastics and promotes recyclable packaging materials in our supply chain.

## Hazardous Materials & Transboundary Movement

---

Certain computer components contain hazardous materials that must be handled by certified recycling facilities under strict government supervision.

- **Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016:** Regulates the safe storage, treatment, and disposal of toxic substances extracted during the e-waste dismantling process.
