Plastic Waste (Management & Handling) Rules - 2011

1. Plastic Waste (Management & Handling) Rules issued by MOEF on 02.07.2011 focus on collection, segregation, and environmentally sound disposal of plastic waste.
2. Municipal authorities are responsible for setting up collection, segregation, storage, transportation, processing, and disposal systems.
3. Manufacturers and recyclers must ensure safe handling and proper recycling of plastic waste.
4. Use of recycled plastic for food contact applications is restricted for safety reasons.
5. Plastic carry bags must comply with prescribed thickness and labeling standards.

Plastic Waste Management Rules - 2016

1. Plastic Waste Management Rules 2016 expanded responsibility to waste generators, producers, and brand owners.
2. Extended Producer Responsibility (EPR) introduced for producers and brand owners.
3. Plastic carry bag thickness standards strengthened to improve recyclability.
4. Local bodies must ensure segregation, collection, and channelization of plastic waste.
5. Registration requirements for producers, recyclers, and manufacturers increased compliance control.
6. Waste processing, recycling, and scientific disposal became mandatory for environmental protection.

Green PC World Compliance Framework

1. Green PC World Private Limited supports responsible waste collection, segregation, recycling, and authorized disposal systems.

2. The company follows environmental compliance practices aligned with CPCB/SPCB and applicable Plastic Waste Management Rules.

3. Proper documentation, safe material handling, and sustainable recovery practices are maintained across operations.
